

# Pumping Stations

Site Electrical are specialists in pumping stations to handle sewage, wastewater and surface water, ranging from small packaged pump systems to large bespoke designs for utility companies.

We will design, supply and install the most efficient pumping station to meet your specific requirements. Drawing on the experience gained over 27 years working for water utility companies, we will provide a system that minimises initial installation costs whilst utilising the latest technologies to reduce Whole Life Costs.

## Services Include:

- Design, Supply and Installation of all pumps and equipment including control panels, chambers, pipework and ducting.
- Complete Mechanical, Electrical and Instrumentation work.
- Installation carried out by our own fully trained engineers.
- Telemetry remote alarm monitoring.
- Maintenance and service contracts where required.

## Recent Customers:

Severn Trent Water  
United Utilities  
Dwr Cymru/Welsh Water  
Airbus UK  
Peel Holdings, Trafford Centre  
George Wimpey Ltd  
Manchester United FC  
Sefton MBC and many more.

We have wide experience in providing pumping stations to Sewers for Adoption standards, and have worked with numerous developers and water utility companies to ensure the prompt adoption of completed stations.
